If your Acura is exposed under the sun for a long time, it's not good for your car. The genuine sunshade helps to reduce the interior temperature when it's too hot outside. Also, the sunshade allows fewer UV rays to go through the windshield to damage your car interior.

Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to: -Build an accurate threat model for your vehicle -Reverse engineer the CAN bus to fake engine signals -Exploit vulnerabilities in diagnostic and data-logging systems -Hack the ECU and other firmware and embedded systems -Feed exploits through infotainment and vehicle-to-vehicle communication systems -Override factory settings with performance-tuning techniques -Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

This 2nd edition takes into account recent changes to A-level syllabuses, including the need for modelling. It has been reset to match the larger format of its companion, UNDERSTANDING PURE MATHEMATICS.

A hilarious and hopeful primer to prevent, combat, and eliminate the suckage in modern marriage by doing it right in the early years, from one of the minds behind the series Sex and the City and the New York Times bestselling authors of He's Just Not That Into You, It's Called a Breakup Because It's Broken, and It's Just a F***ing Date Some marriages start out storybook. Perfect proposal, perfect engagement, perfect wedding, perfect honeymoon, and perfect newlywed years. Greg Behrendt and Amira Ruotola stumbled right out of the wedding gate. Their choices in the early years, they'll tell you, nearly bought their marriage a one-way ticket to Suckville. The New York Times bestselling authors explore all the adventures of early wedlock, from the moment one of you gets on one knee to the day when sex starts to feel like work instead of play. In this guidebook, Behrendt and Ruotola explore their own marriage and, with gleeful candor, tremendous warmth, sharp humor, and piercing insight, look at what we who have decided to "settle down" hope to get out of our most lasting relationship. We venture through volumes on the engagement, wedding planning, the Big Day, the wedding hangover, the (blissful?) first year, the hard work of marrying two lives, fights, and sex-pectations versus sex-pectreality. The perfect book for those who have just put a ring on it or are thinking of putting a ring on it, Behrendt and Ruotola's work is a brilliant guide for the first stretch of that wild ride we call marriage.

The world's most accomplished advertising photographers show off their work in this tribute to their technical, storytelling, and persuasive skills. Cultural influences are apparent in work from such countries as Japan, Holland, Germany, Hong Kong, and Spain, beginning with an interview with Erik Kessels, an award-winning art director. His statement that good photography must generate emotion, not just capture it, is borne out by the 428 pages of full-color images that follow.

There's no business like the car business!? Within months of its launch in late 1998, with every well-known global automobile brand jockeying for a foothold in a small-car market almost monopolized by Maruti Udyog

Limited, Hyundai Motor India's debut production, the Santro, emerged as a force to reckon with. The first car to be conceptualized and designed for ? and then developed and manufactured in ? India, the `Sunshine Car? has, over a period of sixteen years, set the record for the quickest small car brand to go from zero to one million units sold. It achieved profitability for Hyundai at an unprecedented speed and made an impressive global impact as a made-in-India automobile in markets as diverse as Algeria and Zimbabwe, Western Europe and North America. In Santro: The Car That Built a Company, BVR Subbu, who spearheaded much of the Santro's success, reveals the hitherto untold story of how this small car made such a big impact. Vivid anecdotes detail the challenges of introducing a new product in a new market, the canny business strategies that were employed to get the better of rival brands, the unforgettable marketing campaigns that made all the difference ? and the thrills of the high-stakes power battles and everyday drama that characterize corporate India. By turns revelatory, insightful and delightfully engaging, this is a business story with a difference about a car like no other.
