Biology Weebly*

Cells are the basic  
unit of all forms of  
life. In this section  
we explore how

# Read PDF Cell Biology Weebly

structural differences between types of cells enables them to perform specific functions within the organism. These differences in cells are controlled by genes in the nucleus. For an organism to grow, cells must divide by mitosis

The rough ER is sheets of cell membrane folded into a channels, that is attached to the membrane of the nucleus. Its function is to transport the proteins made by

# Read PDF Cell Biology Weebly

ribosomes, and hormones. The rough ER is covered in ribosomes, allowing for the ribosomes to directly deposit the proteins into the channels of the rough ER.

The Cell Cycle The cell cycle is the series of events in the growth and division of a cell. In the prokaryotic cell cycle, the cell grows, duplicates its DNA, and divides by pinching in the cell membrane. The

# Read PDF Cell Biology Weebly

eukaryotic cell cycle has four stages (the first three of which are referred to as interphase):

- In the G<sub>1</sub> phase, the cell grows.
