Overview. Participants in this course will be introduced to information essential to diagnose and respond to adult medical emergencies in oral healthcare settings. Special emphasis is placed on factors to be considered in risk-assessment, recognizing medical emergencies that are immediately life-threatening and must be acted upon promptly (e.g., cardiac arrest); and those problems that, while not immediately life-threatening, require timely stabilisation (e.g., hypoglycaemia).

~~Managing Adult Medical Emergencies in the Dental Office~~

The components of a sound medical emergency plan for the dental office should include: Medical emergency prevention; Development of an action plan; Recognizing a patient's distress and management of medical emergencies; Emergency drugs and equipment; Some states may require that dentists have emergency drugs and equipment. For example, in 2010 Illinois became the first state to enact a law requiring dental offices that administer deep sedation to not only have an automated external ...
