we don't use 2 in the diffraction grating formula. In this diffraction grating experiment you will observe a pattern of diffracted light. If you are using then it will be in seven colors. For monochromatic it will be only dark and bright. You can read more from diffraction grating pdf.

Diffraction grating
explanation with Theory
Sound is propagated in the
form of waves. Sound
produced in an adjoining
room reaches us after
bending round the edges of
the walls. Similarly, waves
on the surface of water also
bend round the edges of an
obstacle and spread into the
region behind it.
