I have some 900 parameters for the fanuc ot controller. My 900 parameters are visible, and when I set my password to write enable I can write in my parameters. But when I want to write a specific bit of a 900 parameter I can only write the last 2 bits. For example, to change parameter 940 from 00000000 to 10000000, this will work.
