Real review, Real practice, Real results.

This book explores the unique experiences of a sister school network in Canada and China contextualized through the lens of the Reciprocal Learning Project, which supports the relationship between a school network and teacher education exchange program of two countries. Huang uses theoretical viewpoints from teacher learning and comparative education research to analyse and interpret what has happened in the emerging cross-cultural school network. The book juxtaposes teacher learning and comparative education research from Shanghai and Ontario as teachers in the two places interact and provides detailed descriptions of teacher collaboration to show how these collaborations were initiated, developed, and sustained, as well as the impact brought about from these collaborations. The book offers a unique opportunity to examine how Canadian and Chinese teachers receive and react to opportunities of cross-cultural collaboration and learning.

Peterson's Private Secondary Schools is everything parents need to find the right private secondary school for their child. This valuable resource allows students and parents to compare and select from more than 1,500 schools in the U.S. and Canada, and around the world. Schools featured include independent day schools, special needs schools, and boarding schools (including junior boarding schools for middle-school students). Helpful information listed for each of these schools include: school's area of specialization, setting, affiliation, accreditation, tuition, financial aid, student body, faculty, academic programs, social life, admission information, contacts, and more. Also includes helpful articles on the merits of private education, planning a successful school search, searching for private schools online, finding the perfect match, paying for a private education, tips for taking the necessary standardized tests, semester programs and understanding the private schools' admission application form and process.

Studies of comparative classroom practice in the teaching of secondary English are limited, especially when it comes to exploration of the day-to-day practice of English teachers in the secondary classroom. This book presents a case study analysis of secondary classroom practice in three countries: Canada, England and Scotland. Each country has had different degrees of state involvement within the secondary English curriculum over the last twenty years. England has had the highest degree of state involvement in that it has had several statutory national curricula and a variety of assessment regimes. Scotland has had a non-statutory curriculum and no national tests and Canada has had no national curriculum at all, with education being determined at province level, and each province varying its policies. The research adopts a case study approach involving both classroom observation and interviews with teachers. Through this, the authors explore the impact of state involvement on the reality of what happens in secondary English classrooms. The book invites readers to consider the applicability of the findings to their own contexts, to examine their own practice in the light of this and to consider the nature of the relationships between policy, personal belief and practice in the teaching of English.

Peterson's Private Secondary Schools: Traditional Day and Boarding Schools is everything parents need to find the right day or boarding private secondary school for their child. Readers will find hundreds of school profiles plus links to informative two-page in-depth descriptions written by some of the schools. Helpful information includes the school's area of specialization, setting, affiliation, accreditation, subjects offered, special academic programs, tuition, financial aid, student profile, faculty, academic programs, student life, admission information, contacts, and much more.

After going through the book, candidates will feel knowledgeable, confident, relaxed and ready to tackle interview math questions.

This unique book is an important source of information for all of those who educate future teachers and those who participate in teacher education as students, researchers, educators and policymakers. The volume also contributes to the international development of higher quality and research-led teacher education provision by providing clear evidence of policy impact. It draws on original research studies, conducted across eight countries in North America, Europe and Australia to analyse the impact of teacher education policy initiatives on 'insiders' in the fields, including education students, teacher educators and mentors in schools. In achieving this, the various chapters in the book analyse the commonalities and differentiations in the many policy reforms in teacher education currently being implemented by national governments. The book reveals some of the hidden consequences of these recent 'reform' efforts. It is also of use for leaders and policy makers in teacher education, providing them with insider perspectives from both theory and practice and making it possible for them to develop research-informed decisions that take into account the voices of insiders. Few texts have considered international policy trends alongside the impact they have had on significant stakeholder groups 'inside' teacher education. In redressing this omission, the book contributes to a better understanding of and improved practice of work in teacher education, both pre- and in-service.
