In this issue of Library Technology Reports, Andromeda Yelton shows how libraries can build on the breadth of this population to help bridge the digital divide and provide even greater access to information. Yelton breaks down the demographics of mobile internet users, provides examples of how different libraries are reaching out to these...

In this issue of Library Technology Reports Virginia Tech librarians Miller, Meir, and Moorfield-Lang offer a collection of first-hand accounts of academic library projects using tablets.

"To diggers a thousand years from now...the works of John D. MacDonald would be a treasure on the order of the tomb of Tutankhamen." Kurt Vonnegut, Jr. How do you extort \$600,000 from a dying man? Someone had done it very quietly and skilfully to the husband of Travis McGee's ex-girlfriend. McGee flies to Chicago to help untangle the mess and discovers that although Dr. Fortner Geis had led an exemplary life, there were those who'd take advantage of one "indiscretion" and bring down the whole family. McGee also discovers he likes a few members of the family far too much to let that happen....

Written as a technology guide for students, practitioners, and administrators, the focus of this book is on introducing current and future trends in library technology and automation within the larger context of strategic and systems planning, implementation, and continuous improvement. Technology is an essential resource for attaining both organizational and patron goals, and planning needs to emphasize the alignment between the clearly defined goals of each. For this alignment to occur on a consistent basis goals must be designed, or engineered, in a systematic fashion where technology fulfills the need to deliver the desired outcomes in an efficient, cost-effective manner. The concept of usability engineering is also examined, where the technology is planned, designed, and implemented in such a way as to maximize utility and ease-of-use for users and employees. Readers of this book will understand both the why and the how of library technology, planning, and implementation articulated in a simple, easy-to-understand fashion. Delivered from academic, public, and school library media perspectives Current and emerging technologies are discussed along with their current and future application in the field of library and information science Technology planning and integration is explained using a systems design process with scenarios and case studies that are articulated in a step-wise, holistic fashion
