The Pursuit of Reason: The Economist 1843–1993. The history of The Economist is fascinating both because it is the story of a great and influential journal and because of its response to all the great issues of the day, from the Irish famine (it did not know what to do) to women's suffrage (inconsistent) and from hanging (always against) to privatization (passionately for).

This is a 1910 volume of philosophy by Charles Francis Keary (1848-1917), who was principally a novelist. Unusual in its relatively personal exploration of ideas, together with its accessible, literary style, the text nonetheless maintains an academically rigorous approach to its exploration of the boundaries of reason.

During much of his life Voltaire's plays and verse made him the toast of society, but his barbed wit and commitment to reason also got him into trouble. Jailed twice and eventually banished by the King, he was an

Outspoken critic of religious intolerance and persecution. His personal life was as colourful as his intellectual one. Voltaire never married, but had long-term affairs with two women: Emilie, who died after giving birth to the child of another lover, and his niece, Marie-Louise, with whom he spent his last twenty-five years. With its tales of illegitimacy, prison, stardom, exile, love affairs and tireless battles against critics, Church and King, Roger Pearson's brilliant biography brings Voltaire vividly to life.

Renowned artist Maira Kalman sheds light on the fascinating life and interests of the Renaissance man who was our third president. Thomas Jefferson is

perhaps best known for writing the Declaration of Independence—but there's so much more to discover. This energetic man was interested in everything. He played violin, spoke seven languages and was a scientist, naturalist, botanist, mathematician and architect. He designed his magnificent home, Monticello, which is full of objects he collected from around the world. Our first foodie, he grew over fifteen kinds of peas and advocated a mostly vegetarian diet. And oh yes, as our third president, he doubled the size of the United States and sent Lewis and Clark to explore it. He also started the Library of Congress and said, "I cannot live without books." But monumental figures can have monumental flaws, and

Jefferson was no exception. Although he called slavery an “abomination,” he owned about 150 slaves. As she did in *Looking at Lincoln*, Maira Kalman shares a president’s remarkable, complicated life with young readers, making history come alive with her captivating text and stunning illustrations.

How are meta-narratives of development entangled in people’s identities and life trajectories? How do they inhabit people’s histories, their understandings of their place in the world, and their dreams for the future? The idea of development has been deconstructed and scrutinized as a “Western” metaphor ordering global difference and as a banner

Under which diverse schemes for societal improvement find legitimacy and common purpose. But how is development assimilated into the worldviews of development's subjects? How does it reshape identities and in what ways is it reshaped in the process? Drawing on a decade of ethnographic research on the Philippine island of Siquijor, *In Pursuit of Progress* explores myths, meanings, and practices of development and its counterparts, progress and modernization. It does so not only by considering development as planned, community-wide interventions aimed at society-wide improvements in living standards, but by recognizing that, as a cognitive tool for organizing relationships between

people, development is personal. For Siquijodnon, development, or kalamboan, is also a process of self-transformation concerning changes in knowledge, body, roles, and cultural orientation. Emblems as diverse as skin color, Christianity, infant formula, and infrastructure make statements about development on Siquijor. Kalamboan is bound up with social mobility, consumption, and status, but so too is it imbued with ideals of the "simple life," a life of austerity and attention to social relationships, and with other assumptions about how people should live. Author Hannah Bulloch analyzes development not only as a prescription for material aspiration but also for moral endeavor. In Pursuit of Progress, offers rich,

ethnographic insights into contemporary Visayan culture, engaging with questions of enduring significance in Philippines studies, including livelihood change, "colonial mentality," everyday politics, and moral economy. It will contribute to debates in anthropology, sociology, and development studies regarding the ways in which discourses of development act upon local and global power relations.

But like much other marine life today, these fish face perilous reductions in their populations due to destructive and illegal fishing, inept fisheries management practices, and dramatic changes in ocean ecology, including those wrought by climate change. In Pursuit of Giants is a moving elegy and a call to arms for the protection of these creatures, as well as a five-year, 75,000-mile global adventure story that takes author Matt Rigney on a quest to discover how once-thriving species are now threatened. Rigney's pilgrimage to encounter these giants takes him from the sportfishing mecca of Cabo San Lucas, to the Great Barrier Reef, from New
