UNIVERSIDAD DE COSTA RICA FACULTAD DE EDUCACIÓN ESCUELA DE ... La labor de todo profesor de ELE y de los manuales usados para enseñar la lengua meta, debe permitir acelerar el proceso de adquisición. La investigación ha constatado que la lectura es una de las maneras más efectivas para afianzar este proceso ya que expone al alumno al modelo de lengua que se pretende adquirir de manera natural y significativa.

La lectura en los manuales para la enseñanza del español ... Rodrigo Salgado Yoon Seok Choi Geogrids have been widely used to construct stable subgrade foundations and to provide a working platform for construction over weak and soft soils.

Its about the trials and tribulations of growing up in the projects in NJ, with the odds and the world against you, but nevertheless you overcome them all, by staying focused, determined and following your dreams. A fresh appraisal of the nature and significance of the democratic left in the Global South.

This book is a guide that shows step by step the process of building simulation models using System Dynamics. It is written in a clear and comprehensible style that illustrates the model construction process. This book will be a useful resource to students, scholars, researchers, and teachers.

http://dx.doi.org/10.12946/gplh6http://www.epubli.de/shop/buch/53894"The spatiotemporal conjunction is a fundamental aspect of the juridical reflection on the historicity of law. Despite the fact that it seems to represent an issue directly connected with the question of where legal history is heading today, it still has not been the object of a focused inquiry. Against this background, the book's proposal consists in rethinking key confluences related to this problem in order to provide coordinates for a collective understanding and dialogue. The aim of this volume, however, is not to offer abstract methodological considerations, but rather to rely both on concrete studies, out of which a reflection on this conjunction emerges, as well as on the reconstruction of certain research lines featuring a spatiotemporal component. This analytical approach makes a contribution by providing some suggestions for the employment of space and time as coordinates for legal history. Indeed, contrary to those historiographical attitudes reflecting a monistic conception of space and time (as well as a Eurocentric approach), the book emphasises the need for a delocalized global perspective. In general terms, the essays collected in this book intend to take into account the multiplicity of the spatiotemporal confines, the flexibility of those instruments that serve to create chronologies and scenarios, as well as certain processes of adaptation of law to different times and into different spaces. The spatiotemporal dynamism enables historians not only to detect new perspectives and dimensions in foregone themes, but also to achieve new and compelling interpretations of legal history. As far as the relationship between space and law is concerned, the book analyses experiences in which space operates as a determining factor of law, e.g. in terms of a field of action for law. Moreover, it outlines the attempted scales of spatiality in order to develop legal historical research. With reference to the connection between time and law, the volume sketches the possibility of considering the factor of time, not just as a descriptive tool, but as an ascriptive moment (quasi an inner feature) of a legal problem, thus making it possible to appreciate the synchronic aspects of the 'juridical experience'. As a whole, the volume aims to present spatiotemporality as a challenge for legal history. Indeed, reassessing the value of the spatiotemporal coordinates for legal history implies thinking through both the thematic and methodological boundaries of the discipline."

This book constitutes the refereed proceedings of the 7th International Conference on Concept Mapping, CMC 2016, held in Tallinn, Estonia, in September 2016. The 25 revised full papers presented were carefully reviewed and selected from 135 submissions. The papers address issues such as facilitation of learning; eliciting, capturing, archiving, and using "expert" knowledge; planning instruction; assessment of "deep" understandings; research planning; collaborative knowledge modeling; creation of "knowledge portfolios"; curriculum design; eLearning, and administrative and strategic planning and monitoring.

A collection of posters, citations, textbook pages, graphics of book covers, etc., created and used by the Catholic Church to indoctrinate mainly children in the support of General Franco and of Christianity in Spain. The selection of papers reprinted here traces the development of syntax from structural linguistics through transformational linguistics to operator gram mar. These three are not opposing views or independent assumptions about language. Rather, they are successive stages of investigation into the word combinations which constitute the sentences of a language in contrast to those which do not. Throughout, the goal has been to find the systematical cites of these combinations, and then to obtain each sentence in a uniform way from its parts. In structural analysis, the parts were words (simple or complex, belonging to particular classes) or particular sequences of these. In transformational analysis, it is found that the parts of a sentence are elementary sentences, whose parts in turn are simple words of particular classes. The relation between these two analyses is seen in the existence of an intermediate stage between the two, presented in paper 4, From Morpheme to Utterance. A further intermediate stage is presented in the writer's String Analysis of Sentence Structure. Papers on Formal Linguistics I. Mouton, The Hague 1962 (though it was developed after transformations, as a syntactic representation for computational analysis). Generalization of both of these analyses leads to operator grammar, in which each sentence is derived in a uniform way as a partial ordering of the originally simple words which enter into it: Each step (least upper bound) of the partial ordering (of a word requiring another) forms a sentence which is a component of the sentence being analyzed.
