In *Health Care Policy and Practice: A Biopsychosocial Perspective*, Moniz and Gorin have updated their text to incorporate health care reform. The authors have also restructured the book to guide students through the development of the American health care system: what it is, what the policies are, and how students can influence them. The first section focuses on recent history and reforms during the Obama Administration to describe the health care system; section two examines the system's structure and policies; and the third section explores policy analysis and advocacy, and

policing and mental health. Police services around the world are innovating at pace in order to develop solutions to the problems presented, and popular models are being shared internationally. Nevertheless, disparities and perceptions of unfairness remain commonplace. Innovations remain poorly funded and largely unproven. Drawing together the insights of eminent academics in the UK, the US, Australia and South Africa, the edited collection evaluates the condition of mental health and policing as an interlocked policy area, uncovering and addressing a number of key issues which are shaping police
