OSHA Workplace Injury and Illness Recordkeeping

OSHA has revised its National Emphasis Program (NEP) for COVID-19. The agency launched the NEP on March 12, 2021, to focus on companies that put the largest number of workers at serious risk of ...

OSHA Recordkeeping Requirements

Recently, several academic studies have asserted varying degrees of under-recording of workplace injuries and illnesses on the OSHA Form 300; (e.g., Boden L.I., Ozonoff A. Capture-Recapture Estimates of Nonfatal Workplace Injuries and Illnesses, 2008 and Rosenman K.D. How Much Work-Related Injury and Illness is Missed by the Current National Surveillance System, 2006). At the request of the Senate Committee on Health, Education, Labor and Pensions and the House Committee on Education and Labor, the Government Accountability Office (GAO) initiated a study on the accuracy of employer injury and illness records. In an effort to identify and correct under-recorded and incorrectly recorded cases and to work cooperatively with the GAO, OSHA initiated this NEP. This NEP also complements the Bureau of Labor Statistics' efforts to investigate factors accounting for differences in the number of workplace injuries and illnesses estimated by the BLS and other data sources. OSHA postulates a likely area where under-recorded injuries and illnesses may exist is in establishments operating in historically high rate industries and reporting injury and illness rates slightly lower than the cut-off rates used by OSHA to compile its primary inspection targeting list under the Site-Specific Targeting (SST) program. This NEP is one component of OSHA's effort to address the issue of inaccurate recording of occupational injuries and illnesses. In addition to this NEP, OSHA is addressing the issue through comprehensive training of its compliance staff to identify and correct violations of the recordkeeping regulation. OSHA will also develop other enforcement and quality assurance programs to address the recordkeeping issue in establishments and industries outside the scope of this NEP (e.g., the construction industry, Partnerships, VPP and SHARP establishments). The industry scope of the NEP is expanded to include industries listed on BLS table SHR02 for calendar years 2007 and 2008. The focus of the NEP will be on manufacturing industries. (see Appendix A) The deletion criterion for establishments with recalculated DART rates greater than 4.2 has been removed. The injury and illness rate criterion for establishments in scope of the NEP is changed from a DART rate of 4.2 or less to a DART rate greater than 4.2 and less than 8.0. CY 2008 ODI data is used for targeting list selection. The period of records review is changed to focus on CY 2008 and CY 2009 records.

OSHA's mission is to assure the safety and health of America's working men and women by promulgating and enforcing standards and regulations; providing training, outreach, and education; establishing partnerships; and encouraging continual improvement in workplace safety and health as well as the development of comprehensive safety and health management systems. Effective and efficient use of resources requires careful, flexible planning. In this way, the overall goal of hazard abatement and employee protection is best served. This Instruction establishes a Safety and Health Management System (SHMS) for Occupational Safety and Health Administration (OSHA) employees. The Instruction also establishes safety and health programs as identified in subsequent chapters for Regional implementation. Employee participation is a key element of any successful SHMS. It is the intent of this program that all employees will participate in all aspects including reporting hazards, incidents, and injury/illness without fear of reprisal. The purpose of this Instruction is to define and implement a Field Safety and Health Management System (SHMS) and appropriate safety and health programs, as identified in the subsequent chapters, for OSHA. OSHA is responsible for ensuring that employees of the Agency have a safe and healthful workplace that complies with the Occupational Safety and Health Act and with OSHA standards. Establishing an effective SHMS appropriate to employees' varied work responsibilities and workplace conditions is also an essential strategy to eliminate/control hazards before they lead to fatalities, injuries and illnesses.

OSHA Recordkeeping Requirements

OSHA Recordkeeping Requirements; The Mechanics Of OSHA Recordkeeping; Location, Retention, And Maintenance Of Records; Employer Decision-making; Analysis Of Recordability Of Case; Evaluating The Extent Of Recordable Cases; Employer Obligations For Reporting Occupational Injuries And Illnesses; Access To OSHA Records And Penalties For Failure To Comply With Recordkeeping Obligations; Recordkeeping Summary; General Citations; Glossary of Terms; Sample Recordkeeping And Reporting Forms; Selected Illnesses Which May Result From Exposure In The Work Environment; Participating State Agencies; United States Department Of Labor, Occupational Safety And Health Administration -- Regional Offices; Flow Charts; Summary of Changes; Index.

OSHA Recordkeeping Requirements

Improve Tracking of Workplace Injuries and Illnesses (US Occupational Safety and Health Administration Regulation) (OSHA) (2018 Edition) The Law Library presents the complete text of the Improve Tracking of Workplace Injuries and Illnesses (US Occupational Safety and Health Administration Regulation) (OSHA) (2018 Edition). Updated as of May 29, 2018 OSHA is issuing a final rule to revise its Recording and Reporting Occupational Injuries and Illnesses regulation. The final rule requires employers in certain industries to electronically submit to OSHA injury and illness data that employers are already required to keep under existing OSHA regulations. The frequency and content of these establishment-specific submissions is set out in the final rule and is dependent on the size and industry of the employer. OSHA intends to post the data from these submissions on a publicly accessible Web site. OSHA does not intend to post any information on the Web site that could be used to identify individual employees. This book contains: - The complete text of the Improve Tracking of Workplace Injuries and Illnesses (US Occupational Safety and Health Administration Regulation) (OSHA) (2018 Edition) - A table of contents with the page number of each section

As the debate over health care reform continues, costs have become a critical measure in the many plans and proposals to come before us. Knowing costs is important because it allows comparisons across such disparate health conditions as AIDS, Alzheimer's disease, heart disease, and cancer. This book presents the results of a major study estimating the large and largely overlooked costs of occupational injury and illness--costs as large as those for cancer and over four times the costs of AIDS. The incidence and mortality of occupational injury and illness were assessed by reviewing data from national surveys and applied an attributable-risk-proportion method. Costs were assessed using the human capital method that decomposes costs into direct categories such as medical costs and insurance administration expenses, as well as indirect categories such as lost earnings and lost fringe benefits. The total is estimated to be \$155 billion and is likely to be low as it does not include costs associated with pain and suffering or of home care provided by family members. Invaluable as an aid in the analysis of policy issues, Costs of Occupational Injury and Illness will serve as a resource and reference for economists, policy analysts, public health researchers, insurance administrators, labor unions and labor lawyers, benefits managers, and environmental scientists, among others. J. Paul Leigh is Professor in the School of Medicine, Department of Epidemiology and Preventive Medicine, University of California, Davis. Stephen Markowitz, M.D., is Professor in the Department of Community Health and Social Medicine, City University of New York Medical School. Marianne Fahs is Director of the Health Policy Research Center, Milano Graduate School of Management and Urban Policy, New School University. Philip Landrigan, M.D., is Wise Professor and Chair of the Department of Community Medicine, Mount Sinai Medical Center, New York.
