Chief equity officer Carl Lavender explained that the series is designed “ to motivate and inspire and educate ... in the pathways of race equity. ” There is a growing effort to push at the rising animus against minorities and immigrants, a lot of it boosted by whites committed to equality.

The role of race in the pursuit of health and happiness—

Race is a concept created for the sole advantage of White people to gain dominance over darker peoples instead of causing friction between one another. For this reason, many White people have little regard for Black people and often forget that they are human.

Beyond Ally: The Pursuit of Racial Justice—The Riveter

June 12, 2020. By Matt Ellsworth. The Flinn Foundation stands with all who speak and work to defeat racism and violence in our nation, especially the scourge of systemic violence against the Black community. George Floyd ’ s killing by police officers in Minneapolis, following so many tragedies like it before, has rightfully galvanized a movement for justice, a movement that today requires protest and nonviolent resistance.

The views expressed in our content reflect individual perspectives and do not represent the official views of the Baha ’ i Faith. Being an active member of the Baha ’ i Faith in the United States today means straddling two worlds – the spiritual and the material.

Community Building in Pursuit of Racial Healing and Harmony

“ The conference ’ s theme, “ From Protest to Policy: The Pursuit of Racial Justice, ” encapsulates all that this moment needs—an awareness of the conditions that created the need for protest, the determination to use the moment to make systemic shifts in public policy, and the ethic of resistance that demands racial justice, ” says Dana A. Williams, Ph.D., interim dean of the Graduate School at Howard University.

Howard University Hosts National Conference— From Protest—

It is the thought that one race is superior or inferior to another race. Racism is based on the belief that humans are separated in different races based on different appearances like skin color or social and moral traits, and culture like language, religion or place of birth. Racism does not understand an individual person by its individualism but puts it into a stereotype of one “ race ” and judges the person based on that stereotype.

In 1954 the Supreme Court decided Brown v. Board of Education; ten years later, Congress enacted the Civil Rights Act. These monumental changes in American law dramatically expanded educational opportunities for racial and ethnic minority children across the country. They also changed the experiences of white children, who have learned in increasingly diverse classrooms. The authors of this commemorative volume include leading scholars in law, education, and public policy, as well as important historical figures. Taken together, the chapters trace the narrative arc of school desegregation in the United States, beginning in California in the 1940s, continuing through Brown v. Board, the Civil Rights Act, and three important Supreme Court decisions about school desegregation and voluntary integration in 1974, 1995, and 2007. The authors also assess the status of racial and ethnic equality in education today and consider the viability of future legal and policy reform in pursuit of the goals of Brown v. Board. This remarkable collection of voices in conversation with one another lays the groundwork for future discussions about the relationship between law and educational equality, and ultimately for the creation of new public policy. A valuable reference for scholars and students alike, this dynamic text is an important contribution to the literature by an outstanding group of authors.

Named a Best Book of 2021 by NPR This inspirational memoir serves as a call to action from prison reform activist Yusaf Salaam, of the Exonerated Five, that will inspire us all to turn our stories into tools for change in the pursuit of racial justice. They didn’t know who they had. So begins Yusaf Salaam telling his story. No one’s life is the sum of the worst things that happened to them, and during Yusaf Salaam’s seven years of wrongful incarceration as one of the Central Park Five, he grew from child to man, and gained a spiritual perspective on life. Yusaf learned that we’re all “born on purpose, with a purpose.” Despite having confronted the racist heart of America while being “run over by the spiked wheels of injustice,” Yusaf channeled his energy and pain into something positive, not just for himself but for other marginalized people and communities. Better Not Bitter is the first time that one of the now Exonerated Five is telling his individual story, in his own words. Yusaf writes his narrative: growing up Black in central Harlem in the ’80s, being raised by a strong, fierce mother and grandmother, his years of incarceration, his reentry, and exoneration. Yusaf connects these stories to lessons and principles he learned that gave him the power to survive through the worst of life’s experiences. He inspires readers to accept their own path, to understand their own sense of purpose. With his intimate personal insights, Yusaf unpacks the systems built and designed for profit and the oppression of Black and Brown people. He inspires readers to channel their fury into action, and through the spiritual, to turn that anger and trauma into a constructive force that lives alongside accountability and mobilizes change. This memoir is an inspiring story that grew out of one of the gravest miscarriages of justice, one that not only speaks to a moment in time or the rage-filled present, but reflects a 400-year history of a nation’s inability to be held accountable for its sins. Yusaf Salaam’s message is vital for our times, a motivating resource for enacting change. Better, Not Bitter has the power to soothe, inspire and transform. It is a galvanizing call to action.

Doing anti-racist work can be profoundly transformational for White people. Not only does it allow them to live their values of justice and equality, but it also helps develop skills like listening, sharing power, and working through conflict. Now more than ever, humanity must bridge the racial divides that exist within our society. Dr. Maysa Akbar, a race-based trauma expert, and originator of the Urban Trauma® framework, deftly delineates what the allyship process is for White people to align themselves with people of color through the lens of a person of color. Dr. Akbar illuminates the concept of White Privilege, the societal barrier which breeds and sustains racism, formulated by generations of oppression. She redefines previous frameworks of allyship, and through her new identity model of allyship, she constructs a much-needed pathway towards race-based rectification for White people. We are facing a global tipping point with regard to racism. To be successful, White people must provide support in the right way. This book not only educates on how we got here but also shows how we address it and fix it moving forward.

As a white woman, ask yourself: are you upholding or fighting racism? What’s Up with White Women? is a practical guide for white women who are interested in becoming more effective in their cross-cultural, anti-racist practices. Blending real-life stories, theory, and anti-racism practices from decades of on-the-ground work, the authors invite white women to understand their gendered role in systemic racism and their unique opportunity for action. Both frank and compassionate, coverage includes: Stories of white women’s experiences with sexism, racism, and white privilege How white women harm BIPOC and ourselves by colluding with systems of oppression Why and how white women often hijack race conversations A powerful six-stage identity development model for self-reflection and growth Guiding questions and practical actions for strengthening anti-racism practices Tools to cultivate genuine partnerships with BIPOC individuals and groups. White women are positioned in a power hierarchy between white men and BIPOC. It is time for white women to step up and undertake deep reflection on their role in systemic racism and take concrete actions that support equity and justice for all people.

Nixon’s efforts in moving the focus of U.S. race relations from reform to indemnifying damages, Yuill argues, at least equal his contributions to the origins of affirmative action through policy innovations.”--Jacket.

Frederick Douglass called the martyred president “emphatically the black man’s president ” as well as “ the first who rose above the prejudices of his times and country. ” This narrative history of Lincoln ’ s personal interchange with Black people over the course his career reveals a side of the sixteenth president that, until now, has not been fully explored or understood. In a little-noted eulogy delivered shortly after Lincoln’s assassination, Frederick Douglass called the martyred president “emphatically the black man’s president,” the “first to show any respect for their rights as men. ” To justify that description, Douglass pointed not just to Lincoln’s official acts and utterances, like the Emancipation Proclamation or the Second Inaugural Address, but also to the president ’ s own personal experiences with Black people. Referring to one of his White House visits, Douglass said: “In daring to invite a Negro to an audience at the White House, Mr. Lincoln was saying to the country: I am President of the black people as well as the white, and I mean to respect their rights and feelings as men and as citizens. ” But Lincoln ’ s description as “ emphatically the black man ’ s president ” rests on more than his relationship with Douglass or on his official words and deeds. Lincoln interacted with many other African Americans during his presidency. His unflinching cordiality to them, his willingness to meet with them in the White House, to honor their requests, to invite them to consult on public policy, to treat them with respect whether they were kitchen servants or leaders of the Black community, to invite them to attend receptions, to sing and pray with them in their neighborhoods—all those manifestations of an egalitarian spirit fully justified the tributes paid to him by Frederick Douglass and other African Americans like Sojourner Truth, who said: “I never was treated by any one with more kindness and cordiality than were shown to me by that great and good man, Abraham Lincoln. ” Historian David S. Reynolds observed recently that only by examining Lincoln ’ s “ personal interchange with Black people do we see the complete falsity of the charges of innate racism that some have leveled against him over the years. ”

In an age where racial and ethnic identity intersect, intertwine, and interact in increasingly complex ways, Black Ethics: Race, Immigration, and the Pursuit of the American Dream offers a superb and rigorous analysis of black politics and coalitions in the post-Civil Rights era. Using an original survey of a New York City labor population and multiple national data sources, author Christina M. Greer explores the political significance of ethnicity for new immigrant and native-born blacks. Black Ethics concludes that racial and ethnic identities affect the ways in which black ethnic groups conceptualize their possibilities for advancement and placement within the American polity. The ethnic and racial dual identity for blacks leads to significant distinctions in political behavior, feelings of incorporation, and policy choices in ways not previously theorized. The steady immigration of black populations from Africa and the Caribbean over the past few decades has fundamentally changed the racial, ethnic, and political landscape in the U.S. An important question for social scientists is how these ‘new’ blacks will behave politically in the US. Should we expect new black immigrants to orient themselves to politics in the same manner as native Blacks? Will the different histories of the new immigrants and native-born blacks lead to different political orientations and behavior, and perhaps to political tensions and conflict among black ethnic groups residing in America? And to what extent will this new population fracture the black coalition inside of the Democratic party? With increases in immigration of black ethnic populations in the U.S., the political, social, and economic integration processes of black immigrants does not completely echo that of native-born American blacks. The emergent complexity of black intra-racial identity and negotiations within the American polity raise new questions about black political incorporation, assimilation, acceptance, and fulfillment of the American Dream. By comparing Afro-Caribbean and African groups to native-born blacks, this book develops a more nuanced and accurate understanding of the ‘new black America’ in the twenty-first century. Lastly, Black Ethics explores how foreign-born blacks create new ways of defining and understanding black politics and coalitions in the post-Civil Rights era.

Introduction : alternative approaches to regional equity and racial justice -- The integration imperative -- Affirmatively furthering community development -- The “holow prospect” of integration -- The three stations of fair housing spatial strategy -- New issues, unresolved questions, and the widening debate -- Conclusion : everyone deserves to live in an opportunity neighborhood

The author looks to the origins of equality in Greek thought and the idea’s important in the eighteenth century to understand the tenacious attraction it has had for American over more than two hundred years of political, legal, and social controversy.
